

MOTUSI

Kit:

- Sense (Full-body monitor & report)
- Engage (Clear interfaces for use)
- Data (Easy access to data & config)
- Control (High-reliability design)
- Evolve (Adaptable Design)

Sensor:

- IMU (xyz acceleration & rotation)
- Skin temperature
- Breath
- Sweat
- Heart rate
- Body torsion & strain

User Interfaces:

- Local (Button, LED, piezo & audio)
- App (Bluetooth - User & audience local)
- External (USB & WiFi – Operator & env.)
- Remote (WiFi – Cloud & services)

System:

- Multi Cortex-M4
- Untethered operation
- On-board storage
- WiFi, Bluetooth & USB
- Audio & Tactile I\O
- User Dev (Arduino)
