Novo Nordisk
Seattle, WA

Hi,

I am writing today for application to the position of Hardware Engineer & Prototyping Electrical Engineer, Job Requisition ID #45307BR. I have enclosed my most up-to-date resume and contact references. I am looking to re-locate for this opportunity and am available immediately to begin work.

I believe I would be a strong asset for Novo Nordisk. My experience in a multi-disciplinary labs environment with Intel Labs, as lead design engineer on a new product and my experience with international team collaboration directly prepare me for contribution and success with Novo Nordisk in this role.

My diversity and amount of experience in the topics of work for the Innovation Architect are high, I look forward to discussing these and other qualifications with you.

Sincerely,

Justin Reina
